

A-320HVA Handheld Vehicle Adapter

*amplifier sold separately

Overview

The A-320HVA Handheld Vehicle Adapter is the ultimate solution for vehicle communications. Now you can use the same handheld radio mounted or dismounted. The A-320HVA brings the proven technology of the A-320* amplifier into the vehicle. It is designed specifically for “jerk-and-run” scenarios, and compatibility with widely fielded radios from Thales and others. The A-320HVA features a universal pocket that accepts up to 16 radios (including variants).

The A-320HVA can be used in tactical or non-standard vehicles as it is capable of operating from any 11-36 volt DC power supply. Additionally, the power supply allows the user to attach an amplified speaker such as the MRC-67A to provide an audio interface.

*A-320HVA compatible with A-320V1, A-320V2-A and A-320V3 only.
