

# ITAR / EAR

## ULTRALIFE PRODUCTS

ITAR (International Traffic in Arms Regulations) and the EAR (Export Administration Regulations) are export control regulations run by different departments of the US Government. Both are designed to help ensure that defense related technology does not get into the wrong hands. An export license is a general term for both ITAR and EAR controlled items in which the US Government has granted permission to transport or sell potentially dangerous items to foreign countries or parties.
